Letter of Recommendation

Chemische Fabrik Berg GmbH (CFB) is manufacturer of Active Pharmaceutical Ingredients with global recognition within the pharmaceutical industry.

AP Fachübersetzungen were commissioned to provide two interpreters to support our team during a GMP inspection by the Russian inspectorate in November of 2019. AP Fachübersetzungen confirmed immediately, that the interpreters Mr. Alexander Podarewski and Ms. Elena Alenina were reserved for the five day inspection.

The professional competence of both interpreters was apparent from the first meeting on the evening before the inspection, where time was used to get to know one another and to familiarize ourselves with any issues of concern prior to the inspection.

During the inspection, interpretation from German to Russian and Russian to German was simultaneous and of the highest standard. Complex words and phrases familiar only to those working on a daily basis in a GMP environment proved no problem for both interpreters.

Professionalism was maintained throughout the inspection. In the closeout meeting, gratitude was shown by both the inspectors and the CFB management team. Free flowing conversation was possible throughout and the inspectors were able to carry out their job without any hindrance.

We are very thankful to Mr. Alexander Podarewski and Ms. Elena Alenina for their hard work. We are convinced that the high quality of interpretation had a large impact on the success of the inspection. We shall be using the services of AP Fachübersetzungen for future inspections, and can advise any company looking to ensure a successful cooperation with the Russian inspectorate to do the same.

Sincerely yours,

Chemische Fabrik Berg GmbH

Mr. Timothy Lay

Head of Quality Assurance
