### Letter of recommendation

LYOCONTRACT is a pharmaceutical contract manufacturer of sterile liquid pharmaceuticals and lyophilization in vials.

Our company commissioned AP Fachübersetzungen to interpret at an inspection by the Russian authority "Ministry of Industry and Trade of the Russian Federation (Minpromtorg of Russia) STATE INSTITUTE OF DRUGS AND GOOD PRACTICES Federal State Institution" lasting 5 days.

The managing director of AP Fachübersetzungen, Mr Alexander Podarewski, and his employee Ms Alenina were able to switch between the German and Russian language at all times. Due to their specialization in the areas of medicine and pharmacy, Mr Alexander Podarewski and his employee were always able to interpret relevant pharmaceutical contexts.

They interpreted in the following areas, among others:

- incoming and outgoing goods, weighing of raw materials, excipients and active ingredients, manufacture of products incl. batch manufacture, filling, lyophilization, crimping, visual inspection for particles and visual defects, as well as packaging of bulk or pre-packaged goods, storage and transport of intermediate products and finished products, product release,
- sampling and sample processing, microbiological test methods, chemical analyses, validation of processes and methods,
- ventilation and air-conditioning technology, water treatment, operation and maintenance of various systems in the laboratory and production area,
- document management, training system, supplier management, quality and risk management, hygiene and many more.

Mr Podarewski and his team distinguished themselves by their highly professional conduct.

We will commission the company AP Fachübersetzungen for future interpreting services and are very happy to recommend them to others.

Dr Tino Galgon  
Managing Director
